

Application No.: 10/706,300  
Filing Date: November 12, 2003

**AMENDMENTS TO THE SPECIFICATION**

**IN THE TITLE:**

Please amend the title as follows:

**OCULAR GLAUCOMA IMPLANT WITH THERAPEUTIC AGENTS  
AND METHODS THEREOF**

**IN THE ABSTRACT:**

Please replace the Abstract with the following rewritten paragraph:

Devices and methods are provided for the treatment of ocular disorders glaucoma. An ocular implant has a body comprising material that includes a therapeutic drug. The body has an inlet portion and an outlet portion. The inlet portion is configured to reside in an anterior chamber of an eye when the outlet portion is disposed in a physiological outflow pathway of the eye. The outlet portion has an outflow opening such that the body drains fluid from the anterior chamber to the physiological outflow pathway. One method of treating an ocular disorder involves introducing an implant comprising a therapeutic drug into the eye such that the implant drains aqueous humor into a physiological outflow pathway and the therapeutic drug reaches eye tissue is adapted such that aqueous humor flows controllably from the anterior chamber of the eye to Schlemm's canal, bypassing the trabecular meshwork. The implant may utilize one or more bioactive agents effective in treating glaucoma or other pathology.

**IN THE SPECIFICATION:**

Please replace paragraph numbers [0001], [0002] and [0003] of the specification with the following rewritten paragraphs:

[0001] This application is a continuation-in-part of U.S. Patent Application No. 10/395,633, filed March 21, 2003, now abandoned, entitled "Stent With Drug Coating," which is a

continuation application of U.S. Patent Application No. 09/549,350, filed April 14, 2000, now U.S. Patent No. 6,638,239 B1, issued October 28, 2003, entitled “Apparatus And Method For Treating Glaucoma.”

[0002] This application is also a continuation-in-part of U.S. Patent Application No. 10/634,213, filed August 5, 2003, entitled “Devices And Methods For Glaucoma Treatment,” which is a continuation-in-part of U.S. Patent Application No. 10/118,578, filed April 8, 2002, now U.S. Patent No. 7,135,009 B2, issued November 14, 2006, entitled “Glaucoma Stent And Methods Thereof For Glaucoma Treatment,” which claims the priority benefit of U.S. Provisional Application No. 60/281,973, filed April 7, 2001. The aforementioned U.S. Patent Application No. 10/634,213 also claims the priority benefits of U.S. Provisional Application No. 60/401,166, filed August 5, 2002, and U.S. Provisional Application No. 60/451,226, filed February 28, 2003.

[0003] This application is also a continuation-in-part of U.S. Patent Application No. 10/046,137, filed November 8, 2001, now abandoned, entitled “Drug-Releasing Trabecular Implant for Glaucoma Treatment,” which claims the priority benefit of U.S. Provisional Application No. 60/281,247, filed April 3, 2001.
